

2016

Doubling Aluminium Demand

Sessions will be structured according to the processes applied in the industry such as fabrication, extrusion, packaging, castings and surface finishing.

The key thematic areas identified and planned for the conference are:

- New Technology and Innovation
- Aluminium Application in the Green Economy
- Aluminium in Transportation
- Employment for the future

Included: 1 day workshop on aluminium applications in the building & construction industry.

Architects earn
1 CPD point
