

WISPECO Aluminium

WISPECO CO-SPONSORS THE 2015 GIFA YOUNG GRADUATES EXHIBITION

On the 1st of April, Wispeco Aluminium was given the opportunity to co-sponsor the GIFA (Gauteng Institute for Architects) 2015 Young Graduates Awards and Exhibition. The seminar was held at the GIFA gallery in Braamfontein and was well attended by various members and students within the architectural industry.

The GIFA Young Graduates Exhibition is an exhibition of the most outstanding final year projects from the architectural schools of University of the Witwatersrand, University of Pretoria, University of Johannesburg and the Tshwane University of Technology. The exhibition maps the themes and issues that interest young graduating architects and aims to understand the methodology and approach they take in making architectural projects. This Exhibition space at 77 Juta Street offers an exciting engagement with the city and aims to define the space as a forum for architects and architecture.

Wispeco's Crealco marketing material and a sample of the Crealco Façade 60 will be displayed throughout the 4 week exhibition period at the gallery. The primary focus for the Crealco team was to intensively market U-Solve and Fenestration Performance Declaration (FPD) to architects and the architectural students during the period.
