Aluminium - light, strong and beautiful

ARCHITECTS AND QUANTITY SURVEYORS

EARN 1 CPD POINT

The Aluminium Federation of South Africa will present a 1 day course on aluminium applications in the Building and Construction industry:

Introduction

- Aluminium is used to manufacture:
 - Fenestration, Shopfronts and Curtain Walls
 - Roof Sheeting and Rain Water Goods
 - Facades
 - Blinds and Shutters
 - Balustrades and Handrails
 - And is found in many other products in buildings

Attend a 1 day course at the splendid Lagoon Beach Hotel Conference centre, and learn about:

- The unique properties and benefits of aluminium
- Fenestration selection to meet the SANS standard
- Sustainable Cities
- The Zero emission House
- The importance of Surface Finishing
 - How to specify Surface Finish to ensure a long life and the guarantee
 - Importance of a Care and Maintenance Routine

The last session will be a workshop in which the course material will be applied.

The presentations and relevant publications and documentation will be provided.

The course has been accredited by the Cape Institute for Architects, CIFA, for 1 CPD point.

Where: Lagoon Beach Hotel, Milnerton, Cape Town
When: Friday, 18 March 2016 @ 08:00

Exhibition: *Key suppliers to the Building and Construction sector will be exhibiting.*
