REVIT families for Crealco products now FREELY downloadable via the Crealco website

Wispeco Aluminium is excited to announce the availability of a comprehensive range of Revit families for various of its Crealco window and door systems.

The innovative and dynamic set of families allow detailed 3D rendering and include **structural** (AAAMSA's 1/175 rule), **Energy Efficiency (actual U-Values & SGHC)** as well as **Safety Glazing (SAGGA Guidelines)** design parameters. This assists architects to not only design and visualize in various colours with ease, but also achieving compliance to SANS 613 (structural), SANS 10400 XA & SANS 204 (Energy Efficiency) and SANS 10400 N (Safety Glazing).

To have peace of mind, remember to ask for an FPD from the window and door installer to assure you receive real durable Crealco products as per your specification (visit www.crealco-fpd.co.za for more information).

Revit families for the following products are now available to download:

- Crealco Casement 28, 30.5, 34, 36 and 38 windows
- Crealco Elite, 500 and 1000 sliding windows
- Crealco Serene tilt and turn windows and doors
- Crealco Palace, 700 and 4500 sliding door
- Crealco 5000 and Vistafold sliding folding doors

For your convenience, Revit families for Crealco Aluminium systems are developed, expanded and made available continually on our Crealco website, Autospec and on DVD upon request.
